Hello everyone--I started editing and then got overwhelmed by the mass of edits already present. Some edits seem to go in different directions, and I think we're losing a coherent theme. So I stopped and wrote a

comment bubble that proposes a bit of reorganization to regain focus and streamline the text. See what you think ... See you all Thursday--Vince

Hi, looking very good, though I have suggested a few more changes on top of rjk and mrg.

Also, I anonymized (is that a word?) the diesel case study and squeezed it down to 125 words.

I added my comments on to Bob's. Still having trouble with the first sentence but gave it a shot. Not sure if I like it any better than the last one. Attached reference is a possible for use as the Bayesian statistical modeling example.

No comments on the tables, although I think we will need to discuss the format and number of case studies as we go forward.

Subject: RE: Innovations In Chemical Risk Assessment Weekly Meeting

Hi All – thanks for the great discussion this week! I’ve tried to capture the key points of our conversation in this revised version of the write-up. I’ve also added a few references, though please let me know if there are others we should add or if you think anything I suggested should be replaced by something else.

Also attached are:

1. The generic attributes table with the footnote about peer review.
2. A template for a case study table (I added Mary’s diesel example to the table, but the text still needs to be changed to make this example generic).

I’ve canceled our meeting next week since it overlaps with the ORD Awards Ceremony. Our next meeting is scheduled for Oct. 27.

Please send any comments, edits and suggests to the group by COB Monday, Oct. 24, so I can turn around a revised version for review by COB Tuesday.

Thanks!
